1 Syringes (A3.5 / B3, A4 / C3, Enamel Universal),  
Shade Guide

**249 € + VAT**

### SYNERGY D6 LIMITED EDITION 130 TIPS

6001 4362

50 Tips each (A2 / B2, A3 / D3)  
10 Tips each (A3.5 / B3, A4 / C3, Enamel Universal),  
Shade Guide

**249 € + VAT**

**Dr. med. dent. Mario J. Besek**  
Swiss Dental Center, Zürich, Switzerland

*In contrast to commercially available "aesthetic composites", SYNERGY D6 is a simplified system for routine use that requires less effort, yet produces comparable or better results. Six dentine shades are available, which blend together so that fewer individual shades are required. The secret is in the chameleon effect with a balanced opacity and homogenised translucency, which are used for aesthetically reproducing the shade of the natural tooth shade. Two enamel shades – universal and opalescent – complete the system and can also be layered as required.*

*The working consistency has been optimally selected for the operator in all the required parameters that are important during sculpting and finishing.*

*In summary, SYNERGY D6 is a viable, all-purpose practice system that successfully produces aesthetic results in the anterior and posterior region using a simple technique.*

## COMPONEER®

Surprise your patients with a new smile –  
in only one session!

- No laboratory required
- One session
- Naturally aesthetic corrections using freehand technique
- Easy application with prefabricated composite veneers
- Brilliant result
- Attractive added value

discount**

## Clinical Indications

### **Treatment of caries**

1. Extensive cervical and interdental caries, discolouration of enamel, and slight malposition
2. Caries treated and homogenised anterior with COMPONEER

### **Optimisation of old restorations**

1. Extensive old and insufficient restorations
2. Reconstructed function with COMPONEER

### **Attrition, abrasion, erosion**

1. Edge-to-edge occlusion with abraded and broken anterior teeth with old restoration
2. Functional and aesthetic teeth with normal overjet constructed with COMPONEER

### **Tooth fracture**

1. Loss of 1/3 of anterior tooth by fracture
2. Simplified shaping and construction with COMPONEER

## Aesthetic / cosmetic Indications

### **Extending incisors**

1. Slightly shortened incisal edge with moderate malposition
2. The tooth proportions are reconstructed and aligned with COMPONEER

### **Malposition**

1. Extensive malposition with crowding
2. Axially aligned correction and repositioning with COMPONEER

# SPECIAL ENDODONTICS

## HYFLEX® CM

6001 1048 - 6001 1079

### The new regenerative NiTi File

- No shape memory + Extreme flexibility = Superior canal tracking
- Regains shape after heat treatment = Multi-use
- Up to 300 % more resistance to separation

**64,60 € + VAT**

LIKE A PHOENIX FROM THE ASHES...  
...THE REGENERATIVE NITI FILE!

No shape memory  
+ Extreme flexibility  
= Superior canal tracking

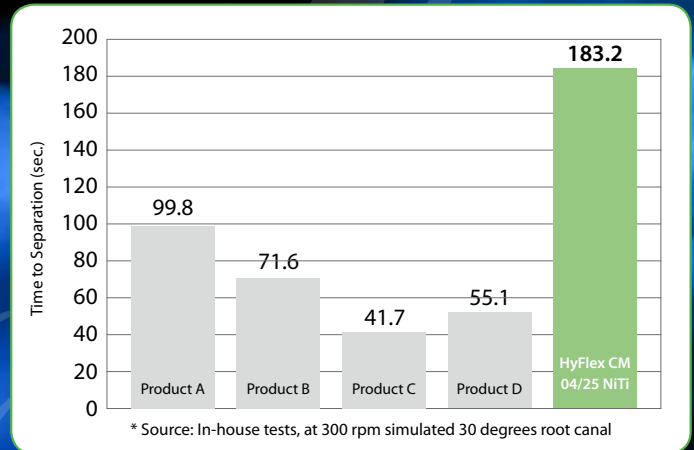

HyFlex™ Controlled Memory NiTi Files have been manufactured utilizing a unique process that controls the material's, making the files extremely flexible but without the shape memory of conventional memory NiTi Files. This gives the file the ability to follow the anatomy of the canal very closely, reducing the risk of ledging, transportation or perforation. Further-more the files can be pre-bent, similar to the way of stainless steel. Particularly in root canals with abrupt curvatures this can help to avoid the creation of steps.

#### Controlled Memory

Up to 300 % more resistance to separation

#### Cyclic Fatigue Test\*

## CANALPRO CL Cordless Handpiece

- Thin ergonomic design for better access to hard to reach areas
- Large, user-friendly LCD panel
- Memory for up to 5 programs
- Auto-reverse modus
- 6 head positions allows of contra angle head to be adjusted to your preferred position
- Operates continuously for approx. 80 minutes at rated load
- Quick charging time of approx. 90 minutes – non-contact charger prevents improper charging due to deterioration of metallic terminal
- Energy-saving, turns off when not used for 10 minutes
- Contra angle head is autoclavable at 135°C
- Rotation Speed (min-1): 140 ~ 550
- Torque Level (N-cm): 0,3 ~ 3,0

**1.159 € + VAT**

## CANALPRO™ APEX LOCATOR

6001 4334

**Innovative and accurate**

- Accuracy of measurement
- User-friendly, intelligent interface
- Virtual Apex Function
- Built-in self-test for a fast function control

**1.014 € + VAT**

## SURGITIP-ENDO

Endodontic aspirator tip  
for the root canal

6001 8280

- Specially designed tip for multi-directional flexibility
- Effective aspiration and good canal accessibility
- Good visibility of working area
- Manufactured in clean room to EN ISO 14644
- Canal Tip ISO 60, inner diameter 0.35 mm

20 pcs

**38 € + VAT**

## Canal Pro Endo Cleaning Pack

6001 9125

- 20 × Surgitip Endo
- 1 × 480 ml Canal Pro NaOCL 3%
- 10 × ROEKO Canal brush size S
- 10 × ROEKO Canal brush size M
- 10 × ROEKO Canal brush size L
- 1 × ROEKO Paper points Top Color # 15-40 (200 points)
- 1 × ROEKO Cotton pellets # 1 (10 gr)
- 5 × CanalPro Slottend-End tips, 27 ga
- 5 × CanalPro color coded syringes (red)

**89 € + VAT**

## COMPRECORD

- Air texturised retraction cord
- Outstanding absorbency

# SPECIAL TREATMENT AUXILIARIES

## HYGENIC® COMPLETE KIT

A dry path to success

H02778

HYGENIC Dental Dam is made of pure, natural rubber latex. Tough and hard to tear, the powdered material is used as a barrier during operative and endodontic procedures.

36 sheets:

- Dental Dam (green, medium)
- Plastic Frame
- Fiesta color coded clamp pack with 9 clamps
- Dental Dam Punch
- Dental Dam Forceps
- Template
- Wedjets small

**389 € + VAT**

## HYGENIC® WEDJETS

Stabilizing Cord

Alternative or in addition to conventional clamp method of securing dental dam.

Latex available in 3 sizes and non-latex in 2 sizes.

- H08040 Latex Extra small (2,13 m)
- H06522 Latex small (2,13 m)
- H06523 Latex large (2,13 m)

- H06524 Non-Latex small (2,13 m)
- H06525 Non-Latex Large (2,13 m)

**20 € + VAT**

## HYGENIC® ELASTI-DAM

Elasti-Dam is considerably more elastic<sup>1)</sup> and tear resistant than standard latex dam making application much easier. At the same time Elasti-Dam offers the excellent retraction properties valued in standard latex dam. Elasti-Dam is powderfree<sup>2)</sup> and has a controlled low level of protein, so patient and dental team are less exposed to allergenic particles and face a lower risk of developing a latex allergy.

- H11625 Elasti Dam Medium green
- H11627 Elasti Dam Medium blue
- H11676 Elasti Dam Heavy green
- H11690 Elasti Dam Heavy blue

**20,30 € + VAT**

# SPECIAL ROTARY INSTRUMENTS

## DIATECH® SPEEDSTER

DIATECH Speedster carbide burs have an advanced technology design for rapid reduction of all materials (amalgam, gold, porcelain, enamel, PFM = Porcelain Fused to Metal). The computer designed flutes cut more concentric, eliminate chatter and vibration, cut longer and let you reduce the preparation and chair time!

Proprietary end cut design is excellent for Endo access

- Efficacité de coupe supérieure
- Durée de vie plus longue
- Carbure de tungstène monobloc concentrique

## Which shape for which indication?

### S1

#### Round

Used for initial cavity preparations, retention grooves, and to create an initial depth mark for prosthetic preparations.

### S2

#### Inverted Cone / Double Cone

The shape of this carbide makes it ideal for removal of amalgams. It may also be used to contour the occlusal anatomy of final restorations.

### S3

#### Pear

Recommended to contour the occlusal anatomy, cavity preparation and amalgam removal.

### S4

#### Cross Cut Fissure

This carbide may be used to create butt-joint margins and to enhance the proximal box of preparations for ceramic inlay/onlays and crowns.

### S5

#### Round End Cross Cut Fissure

Ideal for crown removal, creating deep chamfer crown preparations for ceramic restorations. Larger diameters may be used to create occlusal depth grooves.

### S6

#### Cross Cut Tapered Fissure

Recommended for use in preparing shoulder margins and inlay/onlay preparations. May also be used to refine the axial walls of a preparation and to bevel or contra-bevel finish lines.
